

## NOTICE

### Gas Performance Reporting

#### 2006/07 Annual Performance Report – Gas Distribution and Trading Licences

The Economic Regulation Authority has approved the publication of the 2006/07 Annual Performance Report for Gas Distribution and Trading Licences.

The report summarises the data that has been provided to the Authority by gas retailers and distributors in accordance with their respective licence requirements between 2005 and 2007.

The report is in two parts, with separate sections for the data provided by distributors and retailers.

The aim of the Report is to provide an overview of the gas distribution and gas retail markets in Western Australia, including:

- their size;
- the participants; and
- the amounts of gas being supplied.

The report is available on the Authority's [web site](#).

Following the review of standard form gas distribution and trading licences, the Authority also published the Gas Compliance Reporting Manual in September 2007. The manual included the information that gas distribution and gas trading licensees are obliged to report, consistent with the new standard form licences. The reporting obligations for gas retailers are based on the 2006 SCONRRR Report<sup>1</sup>, which will facilitate inter-state comparison and benchmarking. The information reporting obligations for gas distributors incorporated a subset of the performance indicators for Victorian Gas Distribution Companies<sup>2</sup>. This will help comparison and benchmarking of WA gas distributor performance with that of distributors in other States.
