

PUBLICATION

Water, Wastewater and Irrigation Water Report 2010

WATER SERVICES OPERATING LICENSEES

The Economic Regulation Authority today approved the publication of the *Water, Wastewater and Irrigation Performance Report 2010 (Performance Report)*.

The Performance Report summarises the performance data that has been provided to the Authority by Western Australian water service providers in accordance with the performance reporting obligations set out in the Water Compliance Reporting Manual.

The report is in four parts:

- Part A provides water performance data on 32 major Western Australian towns and small potable and non-potable water licensees;
- Part B provides wastewater performance data for 22 major Western Australian towns and small wastewater licensees;
- Part C provides performance data for major towns or schemes where the data is applicable to both water and wastewater services; and
- Part D provides performance data for the four Western Australian irrigators.

The objectives of the Performance Report are to:

- report on the performance of water, wastewater and irrigation supply schemes operated by WA's water delivery agencies;
- highlight comparative performance outcomes for the different towns served within WA; and
- examine service performance variations over time.

A summary of the key findings can be found in the Highlights section of the Performance Report, which is available on the Authority's [website](#).
