## Technical Rules Committee Members

### Call for expressions of interest

The Economic Regulation Authority is calling for expressions of interest to join the Technical Rules Committee. The Committee provides advice to the ERA on Western Power's technical rules.

The *Electricity Networks Access Code 2004* requires Western Power to have technical rules in place that set out the standards, procedures and planning criteria governing the Western Power network. The ERA is responsible for approving amendments to the technical rules. The Committee provides advice to assist the ERA to make decisions on the technical rules.

The Committee is chaired by a representative of the Co-ordinator of Energy. It includes representatives from Western Power and the Australian Energy Market Operator. The ERA is now seeking to appoint additional members who represent users of the Western Power network. These members could be from generators, retailers, customers with direct connections to the network, companies that facilitate user connections or industry representative organisations.

Applicants are requested to apply in writing and to include a short statement addressing each of the following criteria:

- Their understanding and experience in the application of Western Power's technical rules from the perspective of a user of the network. Please provide details of the types of user that you have experience or knowledge of.
- Their understanding of the regulatory framework governing the regulation of Western Power's network.
- Their understanding of the Western Australian Government's Energy Transformation Strategy and the ongoing work to implement the recommendations of the Energy Transformation Taskforce.
- Their ability to contribute strongly as a member of a small team and to commit to the work of the Committee for at least 18 months.

Expressions of interest should be received by 7 July 2021 and can be sent via email to [electricity.access@erawa.com.au](mailto:electricity.access@erawa.com.au).
