

I wish to register my business for review in the current process.

I have only just seen the document as a small business owner over the Christmas period is a shocking time to send it out for review and reply.

I have a small motel and restaurant and currently the sewerage and water rates and discharge rates are crippling us. We should not have to be charged more than the Metro area when the Metro area is now tapping into the underground water supply and depleting our supplies even more.

Country areas are duped into installing sewerage plants and then realise when they are connected the huge ongoing costs to each and every household and business.

I haven't time to read all this report today, but wish to be kept on the mailing list.

Also, can I have sent to me a hard copy of the report.
