Yurringa Energy Pty Ltd

Revised application for an electricity retail licence – Invitation for public submissions

The Economic Regulation Authority has published a revised application from Yurringa Energy Pty Ltd for an electricity retail licence to supply large use customers within the South West Interconnected System.[1]

On 2 June 2026, we sought public comment on Yurringa Energy's original application.

After consultation closed, Yurringa Energy advised the ERA of significant changes and provided an updated application summary, which is available on the ERA website. Most notably, the changes in the updated application summary are:

- Yurringa Energy intends to service its Western Australian customers from its current base of operations in Victoria during its first few years of operation, rather than opening a Perth office.
- Yurringa Energy has been granted an electricity retailer authorisation by the Australian Energy Regulator to operate in the Australian Capital Territory, New South Wales, Queensland, South Australia and Tasmania; and a licence to retail electricity to business customers in Victoria by the Victorian Essential Services Commission.

The ERA will grant a licence if satisfied that it would not be contrary to the public interest to do so, and the applicant has and is likely to retain, or will acquire within a reasonable time after the grant and is then likely to retain, the financial and technical resources to undertake the activities authorised by the licence.[2]

When considering the application, the ERA also has regard to the public interest matters set out in section 26 of the Economic Regulation Authority Act 2003, which include the long-term interests of consumers.

Invitation for submissions

The ERA invites interested parties to make submissions on the licence application summary.

Submissions close 4:00pm (WST) Monday, 23 November 2026.

Submissions can be lodged online using the form on our Current Consultation webpage.

1 A large use customer is a customer who consumes more than 160 megawatt hours of electricity per year.

2 Sections 9 and 19 of the *Electricity Industry Act 2004*.
