5.5 16t Axle Load Speeds Historical Demand	116
5.6 Passenger Train Speeds Historical Demand	125
5.7 Passenger Railcar Speeds Historical Demand	134
5.8 Maximum Train Lengths Historical Demand	143
6. Existing Demand	152
6.1 24t Axle Load Speeds Existing Demand	152
6.2 23t Axle Load Speeds Existing Demand	161
6.3 21t Axle Load Speeds Existing Demand	170
6.4 19t Axle Load Speeds Existing Demand	179
6.5 16t Axle Load Speeds Existing Demand	188
6.6 Passenger Train Speeds Existing Demand	197
6.7 Passenger Railcar Speeds Existing Demand	206
6.8 Maximum Train Lengths Existing Demand	215

1. Introduction

1.1 Scope of this Level of Service Statement

1.1.1 This Level of Service Statement gives effect to section 2.4 of the Costing Principles as set out in the table below:

Relevant excerpt from the Costing Principles s.2.4	Relevant Section of the Level of Service Statement
The Railway Owner will provide a ten year demand forecast...	Sections 2.1, 2.2, 3, 4
...based on ten years of historical demand data...	Sections 2.3, 5
...and will provide a clear explanation of the forecasting method.	Section 2.5
The level of service associated with the actual...	Section 6
...and reasonably projected demand will be defined in terms of:	Section 3
a) maximum axle loads;	
b) maximum train speeds; and	Section 3
c) maximum train lengths.	Section 4

1.2 Definitions

1.2.1 The terms used in this Level of Service Statement are defined below. Where a defined term is specified to take the same meaning as that set out in the Code, the definition provided by the Code has been repeated here for ease of reference.

Definitions

Term	Definition
Access	Has the meaning described in section 3 of the Code, which is as follows: means (a) the use of railway infrastructure; and (b) where applicable, includes the exercise of other rights of the kind described in section 3A(1) of the Act.
Access Agreement	Has the meaning described in section 3 of the Code, which is as follows: means an agreement in writing under this Code between the Railway Owner and an entity for access by that entity.
Agreement	Means:- (a) Access Agreements; and (b) Out of Code Access.
Arc	Means Arc Infrastructure Pty Ltd, Arc Infrastructure StandardGauge Pty Ltd, Arc Infrastructure NarrowGauge Pty Ltd and each of their Related Bodies Corporate.
Code	Means the Railways (Access) Code 2000 https://www.legislation.wa.gov.au/legislation/statutes.nsf/law_s35.html
Costing Principles	Means Arc's Costing Principles prepared in accordance with and approved by the Regulator pursuant to section 47H of the Code.
Level of Service	Has the meaning described in section 2.4 of the Costing Principles, which is as follows: The level of service associated with the actual and reasonably projected demand, which is defined in terms of: - maximum axle loads; - maximum train speeds; and - maximum train lengths

Term	Definition
Out of Code Access	<p>Means: agreements in writing not under the Code between the Railway Owner and an entity for Access by that entity (as noted in Sch.4 cl.7(2)(a)(ii) & Sch.4 cl.8(3)(a)(ii) of the Code)</p>
Railway Infrastructure	<p>Has the meaning described in section 3 of the Code, which is as follows: means the facilities necessary for the operation of a railway, including —</p> <ul style="list-style-type: none"> (a) railway track, associated track structures, over or under track structures, supports (including supports for equipment or items associated with the use of a railway); and (b) tunnels and bridges; and (c) stations and platforms; and (d) train control systems, signalling systems and communication systems; and (e) electric traction infrastructure; and (f) buildings and workshops; and (g) associated plant machinery and equipment, <p>but not including —</p> <ul style="list-style-type: none"> (h) sidings or spur lines that are excluded by section 3(3) or (4) of the Act from being railway infrastructure; and (i) rolling stock, rolling stock maintenance facilities, office buildings, housing, freight centres, and terminal yards and depots.
Railway Network, Network	<p>Has the meaning described in section 3 of the Code, which is as follows: railways network means —</p> <ul style="list-style-type: none"> (a) all the railways that were Government railways when the Act received the Royal Assent; and (b) all the railways that are on land that is corridor land as defined in the Rail Freight System Act 2000; and (ba) the railway constructed pursuant to the TPI Railway and Port Agreement; and (c) any railway declared under section 3(2) of the Act to be part of the railways network. <p>In respect of these Costing Principles, means the Railway Network managed by Arc.</p>
Railway Owner	<p>Has the meaning described in section 3 of the Code, which is as follows: being the person having the management and control of the use of the railway infrastructure concerned.</p> <p>In respect of these Costing Principles, 'Railway Owner' means Arc.</p>
Regulator	<p>Has the meaning described in section 3 of the Code, which is as follows: means the person who holds, or is acting in, the office provided for by Part 3 of the Act.</p> <p>In respect of these Costing Principles, means the Economic Regulation Authority Western Australia or any subsequent government body or agency undertaking the same or similar function.</p>
Route	<p>Has the meaning described in section 3 of the Code, which is as follows: Those parts of the railways network and associated infrastructure to which the Code applies, and includes part of a route.</p> <p>In respect of these Costing Principles, means those Routes comprised in Arc's Railway Network.</p>
Route Section	<p>Has the meaning described in section 3 of the Code, which is as follows: The sections of the railways network into which the network is divided for management and costing purposes.</p> <p>In respect of these Over-payment Rules, means those Route Sections listed in Appendix 1 of the Costing Principles.</p>

1.3 Interpretation

1.3.1 In this document, unless the context otherwise requires:

- a) the word “person” includes a firm, a body corporate and an unincorporated association;
- b) the words “include”, “includes”, “including” and other words introducing one or more examples of a thing are not to be construed as words of limitation;
- c) words indicating the singular include the plural and vice versa;
- d) a capitalised term has the meaning described in the Definitions section of this document. Where a capitalised term does not appear in the Definitions section of this document it has the meaning described in the Code; and
- e) words which are not otherwise defined should be given their ordinary meaning.

2. Level of Service Explanations

2.1 Demand Forecast – Axle Loads & Speeds

- 2.1.1 The tables in Section 3 indicate the maximum axle loads and maximum train speeds for each Route Section. Unless otherwise stated, this is the Level of Service demand forecast for the next ten years, as required by section 2.4 of the Costing Principles.
- 2.1.2 Axle load and speed are specified together because they are tightly intertwined, such that lighter trains are generally able to travel faster while maintaining safety.
- 2.1.3 There are seven axle loads contemplated:
- a) 24t, 23t, 21t, 19t, 16t – standard axle loads (in tonnes).
 - b) PassTrain – relevant to standard passenger trains, consisting of a locomotive trailing passenger carriages.
 - c) PassRailCar – relevant to standard passenger railcars, where the locomotive and passenger compartment are combined in the one short vehicle set.
- 2.1.4 A “1” in the tables indicates an applicable Level of Service, with the highest permitted speed representing the maximum Level of Service demanded for that axle load.
- 2.1.5 For Route Sections which are sidings, yards or equivalent, Network wide standard limits apply for safety reasons. Therefore some Route Sections appear to have significantly lower maximum speeds than surrounding sections.
- 2.1.6 For a limited number of Route Sections, different maximum speeds are permitted and demanded on different portions of the Route Section (this is particularly the case on long sections). For the purposes of this Level of Service Statement, the lower applicable maximum has been stated.

2.2 Demand Forecast – Lengths

- 2.2.1 The table in Section 4 indicates the maximum train lengths for each Route Section. Unless otherwise stated, this is the Level of Service demand forecast for the next ten years, as required by section 2.4 of the Costing Principles.
- 2.2.2 The lengths are shown in 100m increments, up to 2000m, and are inclusive of the upper bound.
- 2.2.3 A “1” in the table indicates an applicable Level of Service, with the highest permitted length representing the maximum Level of Service demanded.
- 2.2.4 For some Route Sections which are sidings, yards or equivalent, a maximum length is not applicable due to the nature of these sections and their use. These Route Sections show zeroes against all lengths.
- 2.2.5 For a limited number of Route Sections, different maximum train lengths are permitted and demanded on different portions of the Route Sections (this is particularly the case on long sections). For the purposes of this Level of Service Statement, the lower applicable maximum has been stated.

2.3 Historical Demand

- 2.3.1 The tables in Section 5 indicate the historical demand for each Level of Service component.
- 2.3.2 A non-zero number in the table means that Arc had at least one Agreement in place during the last ten years which demanded at least that axle load and speed, or train length, on that Route Section.
- 2.3.3 The value of a non-zero number represents how many years during the last ten years a relevant Agreement was in place. So a figure of 8 in the table means that there were one or more Agreements in place requiring that Level of Service for eight of the previous ten years.

2.4 Existing Demand

- 2.4.1 The tables in Section 6 indicate the existing demand for each Level of Service component.
- 2.4.2 A “1” in the table means that Arc has at least one Agreement in place, as of 31 December 2024, which demanded at least that axle load and speed, or train length, on that Route Section.

2.5 Forecasting Method

- 2.5.1 The Level of Service demand forecast method is as follows:
- a) where an Agreement existed granting Access during the prior ten years, the maximum Level of Service required by those Agreements on those Route Sections is taken as the reasonably forecast Level of Service demanded for the next ten years, on the basis that this demand is expected to continue; otherwise
 - b) where there has been no Agreement granting Access during the prior ten years (in particular, on non-operational lines), the reasonably forecast Level of Service demanded for the next ten years is taken to be equivalent to the Level of Service when the section was last operational, on the basis that future tasks will require at least that Level of Service because it is typically modest relative to modern railway infrastructure; otherwise
 - c) where the Route Section is a siding, yard, or similar non-mainline part of the Network, a Network wide Level of Service is taken as the reasonably forecast Level of Service demanded

for the next ten years, on the basis that any future tasks utilising those sections will be subject to the same safe operating limits that currently apply.

- 2.5.2 Arc's Agreements and Network Rules stipulate the maximum speeds, track axle loads and train lengths applicable to the Network. Both of these sources have been consulted to compile the relevant Level of Service demanded as described above.
