Dear Mr Cooling

Extension of Railways (Access) Code 2000 sections 47J (3) and 47K (3) periods

I refer to Arc Infrastructure's submission of its statement setting out its depreciated optimised replacement cost (DORC) determinations and supporting material, and depreciation schedule provided to the Economic Regulation Authority in accordance with sections 47J and 47K of the Railways (Access) Code 2000 (**Code**) on 6 June 2025.

I am writing to advise that the ERA is exercising its right under sections 47J (4) and 47K (4) of the Code to extend the period required by section 47J (3) and 47K (3) for the ERA to approve or determine Arc Infrastructure's DORC and depreciation schedule.

The ERA is unable to complete its determination within the prescribed timeframe. Additional time is required to properly consider the additional information we requested from Arc and to consider the extensive information provided by stakeholders in their responses to Arc's initial proposal.

The ERA extends the periods referred to in sections 47J (3) and 47K (3) of the Code by 155 business days. The last day of the new period is 25 June 2026.

The ERA will publish a draft determination on Arc Infrastructure's DORC determination and depreciation schedule around the end of January 2026 for public comment. This will inform the ERA's final determination, which currently is scheduled to be published at the beginning of July 2026.

Yours sincerely

[REDACTED]
Steve Edwell
Chair
