Portfolio assessment

Update to published list of Portfolios – ESM Rule 2.16B.5

The Economic Regulation Authority has published an update to the [list of identified Portfolios](#) in the Wholesale Electricity Market (WEM).

This update acknowledges the registration of two new Facilities – COLLIE_ESR4 and COLLIE_ESR5 – in the WEM since the ERA's most recent Portfolio assessment report was published on 14 October 2025.

This update is published to meet clause 2.16B.5 of the ESM Rules, which requires the ERA to update the published list of identified Portfolios within 20 business days of receiving a declaration from a Market Participant when:

- a new Scheduled, Semi-Scheduled or Non-Scheduled Facility is registered in the WEM; or
- there is a change in the registration, ownership or control (directly or indirectly) of an existing Scheduled, Semi-Scheduled or Non-Scheduled Facility.¹

The ERA will complete its annual identification of each Portfolio operating in the WEM by 1 October, at which time these facilities will be allocated to a Portfolio.² Following identification of each Portfolio, the ERA will apply the Materiality Test to determine all Material Portfolios.³ This process is part of the market power mitigation framework in the WEM.
